DESCRIPTION

For use with TecQuipment's Engineering Science kits, the work panel fits on any standard desk or benchtop. Students, teachers or lecturers fit the parts of their kit to the Work Panel (ES1) to study or demonstrate an engineering science topic.

The work panel has its main panel and two supports. All are made from thick perforated metal to allow students, teachers or lecturers to fit the parts of the kits and the work panel in any position suitable for the experiments.

ALTERNATIVE ASSEMBLY

TecQuipment supplies a memory stick with the work panel (ES1). This valuable resource includes reproducible worksheets, guidance notes and lecturer notes (with answers) needed for typical experiments with each kit. The selection of parts in the kits and the choice of fixing points on the work panel means that teachers or lecturers may extend the experiments to an even greater range.
