FC300 FLUME ANCILLARIES (DATASHEET 6 OF 6)

PIERS AND VORTEX INDUCED VIBRATIONS

Optional piers and vortex shedding apparatus for use with TecQuipment’s 300mm Flumes (FC300 range).

BRIDGE PIERS (FC300J)

A pair of sediment walls and four differently profiled bridge piers. The apparatus is used to observe the increased flow velocity and the streamline curvature between the piers. Also scouring of the stream bed.

VORTEX INDUCED VIBRATIONS (FC300M)

The vortex shedding apparatus demonstrates that the drag force of water induces a suspended pendulum to shed vortices from alternate sides (a Karman vortex street).

PIERS AND VORTEX INDUCED VIBRATIONS

STANDARD FEATURES

• Five-year warranty
• Manufactured in accordance with the latest European Union directives
• ISO9001 certified manufacturer

EXPERIMENTS FOR

• Flow Channel (FC300)

SPECIFICATIONS

TecQuipment is committed to a programme of continuous improvement; hence we reserve the right to alter the design and product specification without prior notice.
