

FC50 FLUME ANCILLARIES

Optional ancillaries for use with TecQuipment's 53 mm wide Flume (FC50).

FLOW VISUALISATION (FC50DI)

A gravity-fed dye injector to enable the visualisation of flow lines around obstacles in the channel.

ROUGHENED BED: 2 GRADES (FC50K)

Supplied in two parts totalling 2.25 metres in length. It is reversible with two different surfaces made of evenly spaced raised elements of constant height. One surface has a course roughened face, the other has a finely roughened surface with more closely packed elements.
